

Skip-Counting Practice

Prepare for 2s, 5s and 10s dot-to-dot puzzles

Skip-counting puzzles are the fastest way to make dot-to-dot feel like real maths. Warm up here, then print a matching puzzle.

– Count in 2s

2	4		8			14			20
---	---	--	---	--	--	----	--	--	----

– Count in 5s

5		15			30			45	
---	--	----	--	--	----	--	--	----	--

– Count in 10s

10	20			50			80		
----	----	--	--	----	--	--	----	--	--

– Write your own sequence

Choose a step size, write ten numbers, then check a partner's sequence.

On the puzzle itself, say the step out loud as you draw: 'two, four, six'. Silent counting is where mistakes creep in.
